

Assignment -2
Python Programming

Assignment Date	28 September 2022
Student Name	Ms. Megavarshini S
Student Roll Number	611219106043
Maximum Marks	2 Marks

Question-1:

Build a python code, assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature

Code:

```
import random
print("Welcome\n")

temperatures = int(random.randint(-40,125))

Humidity = int(random.randint(0, 109))
if(temperatures >=-40) and (temperatures <= -1):
    print("Low Temperature, So Cold ")
    print("Humidity Level (Humidity)")
elif(temperatures >= 1) and (temperatures <= 20):
    print("Cold Breeze")
    print("Humidity Level {Humidity}%")

elif(temperatures>=21 and temperatures <= 29 ):
    print("Room Temperature")
    print(f"Humidity Level {Humidity}%")

elif(temperatures>=30 and temperatures <= 54):
    print("Temperature is High... ")
    print("Humidity Level (Humidity)s")
else:
    print("Too Hot")
    print("Humidity Level 0")
```

Output:

```
Welcome

Low Temperature, So Cold
Humidity Level (Humidity)
> |
```
