Question :

Write code and connections in wokwi for the ultrasonic sensor. Whenever the distance is less than 100 cms send an "alert" to the IBM cloud and display in the device recent events. Upload document with wokwi share link and images of IBM cloud.

Code :

```cpp
#include<WiFi.h>
#include <WiFiClient.h>
#include <PubSubClient.h>
const int trigPin = 13;
const int echoPin = 12;
//define sound speed in cm/uS
#define SOUND_SPEED 0.034
#define CM_TO_INCH 0.393701
long duration;
float distanceCm;
float distanceInch;

void callback(char* subscribetopic, byte* payload, unsigned  int payloadLength);
 //-------credentials of IBM Accounts------

#define ORG "2pjy1v" //IBM ORGANITION ID
#define DEVICE_TYPE "Ssfr-devicetype1"//Device type mentioned in ibm watson IOT Platform
#define DEVICE_ID "Ssfr-deviceid1"//Device ID mentioned in ibm watson IOT Platform
#define TOKEN "svkl@2512"     //Token
String data3;

//-------- Customise the above values --------
char server[] = ORG ".messaging.internetofthings.ibmcloud.com";// Server Name
char publishTopic[] = "iot-2/evt/Data/fmt/json";// topic name and type of event perform
