Problem-Solution Fit canvas

1. CUSTOMER SEGMENT(S) **CS**

Passenger

Government

6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES **CL**

Customer can access only to book a seat through application using mobile phones or pc from anywhere.

5. AVAILABLE SOLUTIONS PROS & CONS **AS**

Online web application to book the train tickets

QR code is generated once ticket is booked.

In web application we can be able to track the live location and arriving time of the train.

2. PROBLEMS / PAINS + ITS FREQUENCY **PR**

Most of the People are traveling without booking their ticket

No Proper Guidance in the Online booking Website

No live status updation about the train in which the passengers are traveling

9. PROBLEM ROOT / CAUSE **RC**

To spend long time to book a ticket in station

Passengers are not properly verified before entering into train

7. BEHAVIOR + ITS INTENSITY **BE**

Detects the motion of the passenger and tally that count with the Number of tickets booked.

3. TRIGGERS TO ACT **TR**

Proper checking of their respective ticket before entering the platform.

GPS Tracking is set available to track the location of the train.

4. EMOTIONS BEFORE / AFTER **EM**

Before – Irritated, Confused

After – Satisfied.

10. YOUR SOLUTION **SL**

Passenger need to be at the railway station 15 minutes prior for authenticate themselves with generated QR code to get access for their journey and with the same QR code passenger can verify their details with ticket collector or checker. From this railway management can prevent the ticketless travel.

8. CHANNELS of BEHAVIOR **CH**

ONLINE

They can able to track the location of train

OFFLINE

Scan the QR code in the ticket to verify the information.

Based on the passenger counts the automated doors are opened.
